Social Networking Marketplace for Skilled Reliable People Providing Quality Consumer Services

Working-Bees.com gives you the freedom to follow your passions and explore your talents! Furthermore, with Working-Bees.com you can make vital connections that are useful in business locally, regionally or globally.

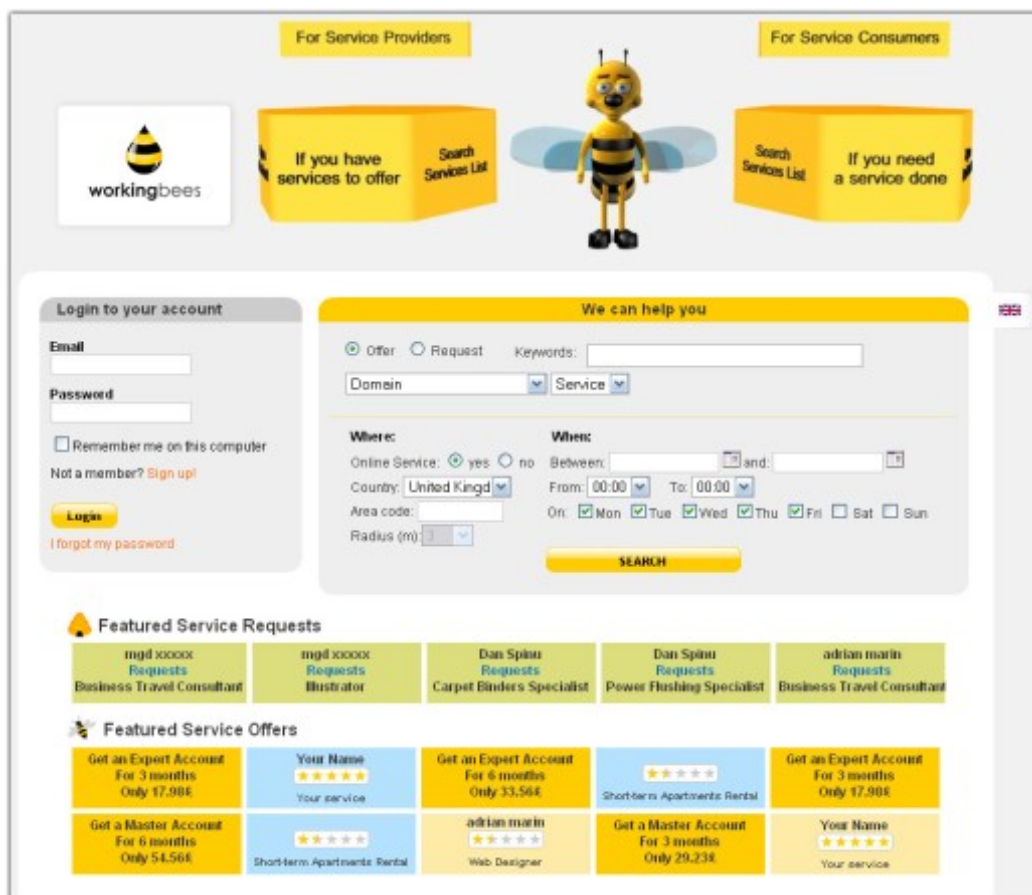

Through Working.Bees.com we rediscover our human side: living in our communities and using the virtual world as a connection mechanism, but spending time with real people. It is a physical place with real people who know you, who appreciate you, who care about you.

Anyone can build a career around what they are passionate about - it is completely feasible to begin by taking on projects after work then gradually building it up until you are able to replace your current income with the income from your new work.

We put people first because every business is about people's needs. We put YOU first because you are one of the people we are here to help.

Our vision is simple - to create the web's most trustworthy online people directory when looking for quality services focused on competence and excellence.

Working-Bees.com is the fun way to help friends, build your personal brand and grow your income. Unlike any other social or business networking service, every feature on working-bees.com has been optimized to help you grow your personal brand.

The Marketplace for Consumer Services by Location, Time, Category and Reputation

We know how frustrating it is to have to use an unknown service provider that you have found in a telephone or online directory without getting recommendations first. But if an emergency occurs, say in the middle of the night or at the weekend, then you simply have no choice in the matter.

If the service is not carried out to your satisfaction, the whole experience can leave you frustrated and disappointed, not to mention financially worse off.

But wouldn't it be great if there was a website that could put you in touch with local or international, reliable service providers whose work has already been endorsed by other happy customers; a website that was as good as a trusted personal recommendation? That is what we thought too so we designed working-bees.com as a valuable tool for hiring the best of the best available.

Mr Taylor was a keen gardener and he constantly received compliments about his beautiful garden. Eventually, friends and acquaintances were so impressed that they started asking him to look after their gardens too. Dissatisfied with his job, Mr Taylor decided to develop a business doing the thing he was passionate about: gardening.

He did not have enough customers to be able to give up his full-time job though. As a shift-worker, however, he did have a couple of daylight hours available, plus weekends, so he decided to take on extra customers. He built up his customer base gradually until he was able to give up his job and devote himself to his gardening business full-time.

He now has a thriving gardening maintenance company and employs 5 staff. Using the profits from his business he is planning to put down a deposit for the purchase of a garden center.

A growing number of people around the world would like to follow Mr Taylor's example. Job loss, tighter credit and a renewed appreciation for savings is persuading more people to use their spare time to make extra cash.

Use working-bees.com to start your own business by putting your capabilities, knowledge, hobbies and interests to good use! Find your skill or what you think would be fun to do. Think about what people are willing to pay you for.
